

# Personal Homepage Project — Homework Checklist

## Day 1 — HTML Structure

- ■ Add at least 3 new HTML elements (e.g., list, extra image, hyperlink).
- ■ Include alt text for all images.
- ■ Check that all links work.
- ■ Push changes to GitHub Pages.

## Day 2 — CSS Styling

- ■ Choose a color palette (3+ colors) and font pairing.
- ■ Style headings, paragraphs, and at least one other element.
- ■ Create and apply at least one class selector and one ID selector.
- ■ Push changes to GitHub Pages.

## Day 3 — JavaScript Basics

- ■ Add a button that changes background color.
- ■ Add a button that changes text or swaps an image.
- ■ Use a variable to display your name somewhere on the page.
- ■ Push changes to GitHub Pages.

## Day 4 — JS Events & Logic

- ■ Add at least one of the following: dark mode toggle, image gallery, or random fact generator.
- ■ Use an array in JS for images or text.
- ■ Push changes to GitHub Pages.

## Day 5 — Forms & Personalization

- ■ Add a form that responds to user input with JS.
- ■ Include a mouseover effect (image or text change).
- ■ Optional: Save dark mode preference using localStorage.
- ■ Push changes to GitHub Pages.

## Final Two-Week Wrap-Up

- ■ Clean and comment all HTML, CSS, and JS code.
- ■ Ensure site works on mobile.
- ■ Include 'About Me', 'Projects', and 'Contact' sections.
- ■ Have at least 3 working JS-powered features.
- ■ Submit your GitHub Pages link.
